**Food vs. Fuel & Jet Funny Car: a Saskatchewan Bio-diesel Producers
impact on both are up for discussion at the
Western Canada Farm Progress Show**

Foam Lake, Saskatchewan based Milligan Bio-Tech Inc., a leader in the Bio-diesel industry in Canada is proud to be a sponsor of the Renewable Energy Centre (AG EX Pavilion) at the Western Canada Farm Progress Show, June 20 to 22 at IPSCO Place in Regina.

Thursday, June 19 at 1:00pm on the Renewable Energy Centre Seminar Stage, Milligan Bio-Tech's Executive Manager Zenneth Faye will be presenting on Milligan's technology, and research and development stages. As well he'll be addressing the Milligan advantage in regards to the Food vs. Fuel debate. Faye, an Engineer, Canola Producer, and advocate of all that bio-diesel has to offer, has been involved in bio-diesel research and development since the early 1990's.

The booth in the AG EX Pavilion will feature the Prairieland Motorsports '007' Jet Funny Car, which runs on Milligan's 100% Canola Bio-diesel. On hand will be Kevin Therres & crew of the 2007 Corvette which is powered by a 7500 hp, J60 Pratt and Whitney engine. It is the fastest jet funny car in the world running on bio-diesel reaching speeds of approximately 250 mph in under 6.5 seconds. You are invited to visit the booth and meet Kevin the driver, and sit in this one of a kind *jet on wheels*. Come learn about the benefits of using bio-diesel from the experts.

Milligan Bio-Tech Inc. is a leading edge Canadian bio-diesel production company with a strong emphasis on research and development. The company, established in 1996, is based in Foam Lake, Saskatchewan and plans to continue expansion of its operations in Western Canada. Our research and development efforts have resulted in Bio-diesel that meets or exceeds the US and European standards for bio-diesel, as well as several co-products such as Diesel Fuel Conditioner, Penetrating Oil and Road Dust Suppressant (RDS). All are environmentally friendly and made from **non-food grade canola**, a renewable resource.
